

Business Processes

Computing and Mathematics

May, 2026

Short Title:	Business Processes	
Faculty	Science and Computing	
Department	Computing and Mathematics	
Cluster	Business	
Author	RLYNG	
Credits	5	Level: Introductory

Description of Module / Aims

This module explores organisational structures and the generic business functions within those structures; globalisation and its impact on organisational structures is also key theme. Major generic business processes and how they are mapped will be addressed while process management concepts and strategies will also be discussed.

Programmes

BUSS-0047 BSc in Information Technology (WD_KINFT_D)

1 / 2 / M

Indicative Content

- Functional organisations and their advantages and disadvantages
- Process-driven organisations and their advantages and disadvantages
- The effects of globalisation on modern business structures including threats and opportunities
- Key generic business functions: Operations logistics; inventory management; sales; accounts; HR; purchasing
- Key generic business processes: Procurement; production; fulfilment
- Process management concepts and strategies
- Business process mapping using appropriate notation

Learning Outcomes

On successful completion of this module, a student will be able to:

1. Differentiate between functional and process-driven organisations.
2. Explain the role of typical business functions.
3. Discuss the impact of globalisation on modern businesses.
4. Explain generic business processes and their interconnections.
5. Map business processes using appropriate techniques.
6. Discuss management strategies in the context of business processes.

Learning and Teaching Methods

- This module will be presented using a combination of formal lectures and practical classes.
- Lectures will introduce concepts and an emphasis will be placed on interaction, discussions and in-class exercises.
- In practical classes, students will engage with business process mapping techniques and will work on case studies and exercises.

Assessment Methods

	Weighing	Outcomes Assessed
Final Written Examination	50%	1,2,3,4,6
Continuous Assessment	50%	
<i>Group Project</i>	25%	3,4
<i>In-Class Assessment</i>	25%	5

Assessment Criteria

- <40%:** Unable to interpret and describe key concepts of the specific knowledge domain(s). The student cannot explain basic business process concepts.
- 40%-49%:** Be able to interpret and describe key concepts of the specific knowledge domain(s). The student gives basic but accurate explanations of business process concepts but they are not supported with examples or cases.
- 50%-59%:** Ability to discuss key concepts of the specific knowledge domain and ability to discover and integrate related knowledge in other knowledge domains. The student gives accurate explanations of concepts with brief outlines of examples and cases.
- 60%-69%:** Be able to solve problems within the specific knowledge domain(s) by experimenting with the appropriate skills and tools. The student explains business process concepts and links some theory to practice.
- 70%-100%:** All the above to an excellent level. Be able to analyse and design solutions to a high standard for a range of both complex and unforeseen problems through the use and modification of appropriate skills and tools. The student clearly explains all concepts and provides a very clear link between theory and practice utilizing many examples and cases.

Learning Modes

Learning Mode	F/T Hours	P/T Hours
Lecture	36	
Practical	12	
Independent Learning	87
