Project Management and Marketing (A32366)

Short Title: Management and Marketing
Faculty Science and Computing
Department Science
Cluster Placement and Projects
Author JGERAGHTY
Credits 10

Level: Postgraduate

Description of Module / Aims

The module will equip participants with methodologies to undertake project planning and implementation aimed at delivering desired results. The challenge of converting to organic and biological production and successfully planning this transition will be analysed and discussed. Participants will be able to estimate project duration and associated costs and develop skills necessary to plan, control, monitor project schedules and manage human resources. Integrated with this the marketing component of the course will introduce the participant to the principles of marketing and how these can be applied successfully in the Irish and European marketplace. Factors influencing the consumer buying process, identifying appropriate markets, new product development and associated marketing mix elements, including targeted communications using online platforms will be addressed.

Programmes

PR0J-0204	MSc in Organic and Biological Agriculture (WD_SOBIA_R)	2 / 3 / M
PR0J-0204	Postgraduate Programmes in Science (WD_SGRAD_XX)	5 / 0 / E

Indicative Content

- Business planning and project design: work breakdown structure, critical path network, project risk management, change management, and quality control.
- Project cost measurement and management using the concept of earned value.
- Managing a project team -- leadership, resource allocation, administration, the role of the project manager, project completion and handover
- Consumer and organisational buying behaviour: factors impacting consumer, household and organisational buying behaviour; steps in the buying process; the concept of derived demand.
- Market research into market segmentation, positioning and branding strategies.
- The Marketing Mix -- co-ordinating product, pricing, distribution and promotional strategies for effective marketing campaigns

Learning Outcomes

On successful completion of this module, a student will be able to:

1. Describe and illustrate project plans to estimate project duration using appropriate software tools.
2. Prepare business planning guidelines to cater for change management and project risk associated with transition to organic systems.
3. Demonstrate a detailed knowledge and comprehension of the human resource aspects of developing projects - organisation, roles, skillsets required.
4. Estimate and evaluate project costs, report on project earned value, and analyse project cost variances.
5. Critically assess the importance of marketing to a farming business and evaluate key marketing fundamentals e.g. target market segmentation, positioning and branding strategy.
6. Design and develop an integrated marketing plan for a farming business with new product offering(s).
7. Select, appraise and summarize relevant case examples for developments in project management and market research from the published literature.

Learning and Teaching Methods

- Online lectures with live participatory discussion sessions
- Case studies on agroforestry and enhanced biodiversity on organic farms
- Webinar presentations with experienced practitioners

Assessment Methods

	Weighing	Outcomes Assessed
Final Written Examination	50%	1,2,3,4,5,6,7
Continuous Assessment	50%	1,2,3,4,6,7
<i>In-Class Assessment</i>	25%	1,2,3,4
<i>Assignment</i>	25%	3,5,6,7

Assessment Criteria

- <40%:** Very little knowledge and understanding of the subject matter. Unable to carry out critical thinking or practical skills.
- 40%--59%:** Will be able to show a good knowledge of the key learning outcomes, including the main aspects of project management and marketing principles. The student will be able to write and present a quality case study on project management and a marketing plan for an agri-business.
- 60%--69%:** In addition, the student will demonstrate more detailed knowledge of all the topics, including human health developments and trends. The student will also be able to write and present a good quality case study on project management and a marketing plan for an agri-business.
- 70%--100%:** The learner will be able to demonstrate comprehensive knowledge and understanding of all learning outcomes, including project cost measurement, market research, and the marketing mix. The student will write and present a related high quality case study on project management and a marketing plan for an agri-business.
